Dear Hiring Manager,

I am writing to apply for the Internship at Astro Media Solutions.

"Diversity is a driver of creativity." This quote from your manifesto resonates with me. As a Computer Science student who runs his own small business, I bring a diverse mix of hard data skills and commercial awareness.

Why I fit the AMS Data Analyst Team:

1. I love "Data Cleaning" & Formatting: The JD mentions ensuring data is formatted to AMS standards. In my FIFA World Cup project, I spent weeks cleaning raw third-party data using Python to ensure accuracy. I enjoy the messy work of making data ready for analysis.
2. I have experience with "Revenue Reports": For my business, Print With Sahel, I don't just print documents; I analyze the numbers. I prepare weekly revenue and performance reports to understand my sales trends. I understand that data isn't just numbers; it's the heartbeat of the Sales team.
3. I can tell a story (Presentation Decks): I know that insights are useless if they are boring. Through my Empowering Refugees project, I learned how to conduct market research and package it into an interesting presentation deck and case study. I am eager to apply this to Astro's advertising products.

I am available for a 6-month internship and ready to start brainstorming and crunching data immediately.

Best regards,

Myat Min Khant
